## Boxspan - Saving weight and time at Sydney Markets

### Boxspan

Strong, Straight, True to Size

The newest addition to the Sydney Markets Fresh Produce Hub or commonly known as “Sydney’s food bowl”, this state-of-the-art sorting facility will soon become the new headquarters for some of Australia’s largest fresh produce suppliers. This new facility is located a stone’s throw from the main produce market located in Sydney’s inner western suburb of Homebush. The unassuming design of the facility is complimented by the neutral grey tones used to accentuate the metal mesh façade, which is a well-balanced blend of a visually appealing, durable industrial products. What makes this construction

particularly unique is the frame that was used behind to mount the mesh panelling, Spantec’s Boxspan was selected due to its strength, light weight and time saving benefits of being able to construct on the ground and simply lift into place.

**Company** - Reitsma

**Location** - Homebush NSW

**Products** - Boxspan 100x50x1.2 beams with associated Spantec brackets

**Quantity** - 1200 l/m of products manufactured to exact length, no wastage.
